

# TRACT

TORONTO RIDE ACCESSIBLE COMMUNITY TRANSPORTATION

## Scheduler

Tracts Calendar is designed to be flexible, and easy to use. It features the ability to resize any window interactively, extensive use of the drag-n-drop technology, as well as all of the most advanced scheduling options you might ask for.

- The scheduled ride request can be seen on the calendar based on 1, 2, 3, or 4 weeks
- You may access (By right clicking in the calendar) the ride planner, request form, On-going, customers, agencies and resources. This is helpful for the dispatcher as one screen provides them a visual of their scheduled rides.
- A calendar can also be created per user

Scheduler for everyone (System user)
